

SAP MDG Intelligent Support Assistant

Enterprise AI Recommendation Report

Master Thesis Project | IU International University

Artificial Intelligence powered SAP Support Recommendation using Retrieval-Augmented Generation (RAG)

Executive Summary

This report was automatically generated by the SAP MDG Intelligent Support Assistant. The submitted SAP support ticket was analyzed using Sentence Transformers, FAISS semantic retrieval and the Llama 3.2 Large Language Model. The recommendation is generated from historical SAP incident knowledge.

Submitted Ticket

SMQ1 outbound queue is blocked and SAP MDG replication is not processing.

AI Analysis Overview

Confidence	79%
Confidence Level	High
Embedding	all-MiniLM-L6-v2
Vector Database	FAISS
LLM	Llama 3.2
Retrieved Records	3
Response Time	43.914 sec

Issue Summary

SMQ1 queue contains failed outbound messages after SAP MDG replication.

Possible Root Causes

- RFC destination unavailable.
- Outbound queue blocked.
- Incorrect DRF configuration.

Diagnostic Steps

- 1. Review SMQ1 queue.
- 2. Check the status of failed outbound messages.
- 3. Check SM59 RFC connection.
- 4. Check DRFOUT configuration.
- 5. Review SLG1 application logs.

Recommended Resolution

- 1. Resolve the underlying RFC or DRF configuration issue.
- 2. Reprocess the affected outbound queue entries.
- 3. Retry the MDG replication.
